

# ROTUNDA IVF

The National Fertility Centre

*the story  
of new life*

### *You want a baby*

You have reached many milestones in your life. You found each other. You realised ambitions. You are a person of the world. Yet, one goal is still outstanding; one dream unfulfilled; one life still not lived – you want a baby.

### *Sometimes it takes time*

One in five couples in Ireland do not conceive within the first year of trying and one in ten experience difficulty in having their second child. Getting pregnant does not always happen immediately.

### *Sometimes it takes a little help*

If you are 35 or under and have been trying for a year, or if you are over 35 and have been trying for 6 months, to get pregnant, then it is recommended that you talk to a fertility expert.

Maybe there's a problem, maybe there isn't.

Or, you may want to discuss your experiences in fertility treatment to date. Having tried and failed, you may want a second opinion.

That's what we're here for - to air your concerns, help you address the problem and move on.

Talk to your GP or call Rotunda IVF directly, it's up to you.

Give us a call, when you are ready.

Our direct line is **(01) 807 2732**

*Helping generations make new generations.*

### *Why so many patients choose Rotunda IVF*

People sometimes come to Rotunda IVF with a burden of worry about their health and fertility, as well as, uncertainty about what the future holds.

We understand the complex needs of our patients. We know that it takes emotional and physical harmony as well as a treatment plan to create a new life.

### *Rotunda IVF Treatment Options*

Every fertility challenge is different and we spend time discussing each person's individual needs. Here is a summary of the options that we provide.

- Fertility counseling and patient support
- Follicle tracking and Intrauterine Insemination (IUI)
- Semen Analysis
- In Vitro Fertilisation (IVF)
- Intracytoplasmic Sperm Injection (ICSI)
- Laser Assisted Hatching
- Blastocyst Culture
- Endometrial Scratch
- Donor Treatment\*
- Recurrent Miscarriage Investigations
- Recurrent Implantation Failure Investigations
- Fertility Cryopreservation for Oncology / Medical Clients

\* Referred to our Partner Clinics.

## What our Patients say

*Hi Rotunda IVF Team,*

*We're two weeks on and doing well. The babies are very patient with their inexperienced parents. We're wearing large L-plates but so far they haven't packed their bags and left. So that's good! We just love them.*

**Mary & Martin**

## *Our Dream Come True*

*It wasn't to be for me due to the other health issues, but I won't forget your support in helping me to move on to other ways of fulfillment.*

**Jane**

*A big thank you for your kindness and practical approach when we attended Rotunda IVF last year. Having had breast cancer and one failed attempt, we now have a gorgeous baby boy. We wanted to thank you and all the nurses in the unit for your support during our initial struggle to get pregnant.*

**Aishling & Mark**

## Three Pillars of Rotunda IVF

Our patient feedback identifies three Rotunda IVF Pillars.

- Reputation you can Trust
- Relationships you can Rely On
- Results you can Expect

## Reputation you can Trust

If you are looking for a fertility clinic with the best reputation, then look no further.

The Rotunda Hospital is the world's oldest maternity hospital and, as home to Rotunda IVF, has cared for generations of families since 1745. Rotunda IVF, which was founded in 1989, has provided many thousands of couples with babies and we will continue to do so for generations to come.

Our long-standing legacy has attracted the best doctors, nurses, embryologists and counsellors to work with Rotunda IVF. Our fertility specialists continue to pioneer new tests and treatments. We are part of Virtus Health, one of the world's largest fertility treatment groups.

## Among our achievements are:

- Highest Pregnancy Rates in Ireland
- First baby born from a vitrified embryo
- First baby born after the use of antagonist (short) protocol
- First clinic to introduce egg freezing for cancer patients
- We are the National Gamete Centre specialising in fertility preservation for oncology patients
- Rotunda IVF an RCOG accredited sub-specialty training centre in reproductive medicine and surgery.

### Relationships you can Rely On

Fertility treatment can be emotional and uncertain. If you are looking for a team of people you can relate to, then look no further.

From the moment you arrive at the clinic, everyone in Rotunda IVF takes on the goal of helping you to feel confident and comfortable in our care so that you can conceive a baby. Doctors, Patient Support, Nurses and Administration – all work as a close-knit team – for your benefit.

Our dedicated Patient Support team helps patients to deal with their practical and emotional worries – such as how to communicate with each other under pressure; how to manage work demands during treatment, or how to manage time and financial resources. Our Patient Support team can help you to overcome concerns and focus on your main goal – creating a new life.

Every member of our team follows your progress right through your testing and treatment. We are there to answer questions and give you insights, whenever you need us.

Your goal becomes our goal.

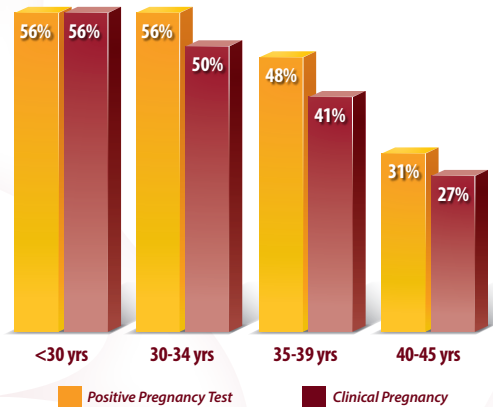

### Results you can Expect

If you want a clinic with top results, you have found us.

Our multi-disciplinary team, our research and the individualised treatment plans developed with your input, ensure that Rotunda IVF consistently achieves world-class success rates.

Pregnancy rates in excess of 50% per single cycle are routinely achieved, where a woman is below the age of 35. Pregnancy rates, for women under 40, rise to 70% over the course of two cycles.
